## **Projects**

**Project1 : PRIVATE FINANCE**  
**Client Name : GOOD RETURNS**  
**Duration : 2YEARS**  
**Role : PLSQL DEVELOPER**

### **Description:**

Goodreturns is a Non-Banking Financial Company registered with the Reserve Bank of India. When Customer need money to purchase any electrical goods or nonelectrical goods. Customer can apply for loan the borrowers agree to pay a certain set of terms, including any finance charges, interest, etc. Based on your application, the lender will either approve or deny the application. If your application is denied, the lender has to provide a reason for the same.

Customer application is approved lender transfers the loan amount to organization ( Showrooms, Shops , Retail Store or shopping mall) that money Customer need to pay back along with the interest and other charges.

one of the most important factors while taking a loan is interest rates. Loans with higher interest rates will cost more money to the borrower - he has to pay higher monthly payments or take longer to pay off the loan compared to the loan with a lower interest rate

Worked for Organization financial settlements.

### **Responsibilities:**

- Developing Procedures and Functions and oracle loader for crucial modules Data migration, Data updating Modules.
- Handling business logic of module Customer creation, EMI calculation, LPC calculation.
- Working experience on data migration, Audit Logs, Job scheduling and Reports.
- Creating database objects through development and testing environments. Creating triggers for the application business logic.
- Developing SQL queries for the manipulation of data and transferring data.
