Project Experience:

Title of the Project : **HRONE**

Project Description: HROne is a project where the clients can use for HR related operations like Attendance, Payroll etc. This application has various services for various features of this application. In order to make sure all the services running for various clients, we created another application called HROps. In HROps, we track the issues raised by clients through a dashboard. This was an automation system to collect the issues from various clients and present in the dashboard so that we can resolve the services which are down or having some other issue. In addition, i have worked on a module specific to import the client's employee details like the nominee detail. We have created a feature through which these details can be imported in bulk using Excel Import.

Technology- ASP.Net Mvc , SQL server, Web API, Git, JQuery , ADO.net, Azure app service.

HROps
Technology-

ASP.Net Core, SQL server, Web API, Git, JQuery , ADO.net, Azure app service.

Title of the Project : **Gamma Investing**

Project Description: One project for Gamma Investing was related to ETF's where the client has customers who invest in ETFs and they help their customer to pick the right ETF through their Last 20 Years performance. Here we had a FTP server containing 20 yrs. of Listing of various ETF in the US market in XML format. Our task is to call these ftp servers, get the data and store it into our application database. All these apps are MVC Web application with C# and sql.

Technology- ASP.Net 5, MVC, SQL server, JQuery, toggleBox.

Title of the Project : **Micamp solutions**

Project Description: One project for Micamp solutions was a web application that gives different payment options to receive payments like digital and physical. All these apps are ASP.NET Core Web application with C#, SQL and Jquery as major coding languages.

Technology- ASP.Net Mvc , SQL server, API, webhook, Azure blob storage, Azure web job, Web API, Azure app service.

Title of the Project : **AdBooking**

Project Description: Enterprise Resource Planning (ERP) integrates internal and external management information across an entire organization, embracing finance/accounting/manufacturing/sales and services, CRM etc. ERP systems automate this activity with an integrated software application. Its purpose is to facilitate the flow of information between all business functions inside the boundaries of the organization and manage the connections to

outside stakeholders. It includes modules like **AdBooking, Circulation** etc. Every module consists of 3 parts.
